Highly motivated and results-oriented software engineer with 9+ years of experience building scalable web and mobile applications. Possesses a strong understanding of various technologies including ReactJS, NodeJS, VueJS, NextJS, and TypeScript. Proven track record of leading technical initiatives, improving performance, and mentoring junior developers. Passionate about creating innovative solutions that deliver exceptional user experiences.

Professional Experience

Full Stack Developer **SmartIBAN** **March 2025 - Present**
Bucharest, Romania

As a full stack developer, I contributed to modernizing applications, improving development efficiency, and delivering scalable solutions using Vue.js, Node.js, and PrimeVue. Key contributions include:

- Helped integrate a unified design system to standardize UI across applications and streamline frontend workflows
- Worked within Agile and TDD methodologies, contributing to clear and testable code.
- Supported team members through code reviews, pair programming, and technical discussions
- Applied knowledge of networking concepts (TCP, HTTP, TLS) to troubleshoot and optimize application performance.
- Followed security best practices for backend, web, and mobile development, supporting robust and secure systems.

Technologies: JavaScript, VueJS, PrimeVue, Tailwind, Node.js, Node Tap, Mysql, Git, Gitlab, Restful APIs, Microservices Architecture

Full Stack Developer **Tremend by Publicis Sapient** **December 2020 - 2025**
Bucharest, Romania

As a technical leader, I drive initiatives that modernize technology, enhance development processes, and architect scalable systems. Examples include:

- Led projects for 20+ major clients (including Vodafone, ASDA, Altex, Hotelernet), delivering 70+ full-stack features, achieving a 95% customer satisfaction rate, and overseeing 10+ successful software releases.
- Initiated React.js adoption, improving UI performance metrics (like page load time and interactivity) by 40%.
- Integrated design systems (PandaCSS, Tailwind) and component libraries (Material UI, Chakra UI) to streamline development and ensure UI consistency.
- Led a full-codebase migration to TypeScript, boosting maintainability and reducing runtime errors by 25%.
- Integrated AI-powered coding tools, accelerating development by 15% and reducing code review time by 25%.
- Designed and implemented CI/CD pipelines, accelerating release cycles and ensuring code quality.
- Oversaw software delivery processes, demonstrating expertise in Agile, Waterfall, and TDD methodologies.
- Mentored 20+ junior/mid-level programmers, elevating their development skills.
- Prepared technical documentation and participated in hackathons, fostering innovation within and outside project teams.
- Leverage deep understanding of networking concepts (TCP, HTTP, TLS) to troubleshoot and optimize application performance.
- Analyze performance data to proactively identify and resolve bottlenecks, ensuring smooth user experiences.
- Secure backend, web, and mobile applications, demonstrating commitment to robust development practices.

Technologies: JavaScript, TypeScript, React.js, Next.js, GraphQL, Vue.js, React Native, Redux, Node.js, Jest, Cypress, AWS(EC2, S3, ECS), Docker, Nginx, PostgreSQL, Git, Gitlab, Sentry, Restful APIs, Microservices Architecture, SQL and NoSql databases

Software Developer **Evonomix** **August 2018 - January 2019**
Constanta, Romania

As part of my software development experience, I contributed to the Flaminjoy project, honing my skills in building web applications with a focus on social media integration. My expertise includes:

- Contributed to the development of the Flaminjoy marketing platform, utilizing Laravel and Vue.js technologies to deliver a seamless user experience.
- Supported the integration of Instagram and Facebook APIs, enabling social media interaction and data management within the application.
- Developed frontend Vue.js components based on provided designs, ensuring visual consistency and adherence to UX principles.
- Collaborated with the development team to ensure efficient frontend-backend communication, contributing to the overall success of the project.
- Demonstrated proficiency in modern web development practices, utilizing technologies like Laravel, Vue.js, and social media APIs.

Technologies: Laravel, Vue3, Instagram & Facebook APIs, Agile

Full Stack Developer **Freelancer** **May 2017 - Present**
(Remote)

As a seasoned freelance developer, I excel at building tailored solutions, modernizing workflows, and delivering scalable applications. My expertise includes:

- Led the development of full-stack web applications, utilizing ReactJS, NextJS, React Native, and Node.js (Fastify, Express, Hono). Integrated MJML for streamlined email templating solutions.
- Designed and implemented desktop and cross-platform applications, leveraging Electron, React Native, Expo, and Capacitor technologies.
- Developed video ad photo editing applications, employing Electron, ReactJS, FFMPEG, and Sharp library for robust photo & video manipulation.
- Built web and mobile CMS solutions for real estate apartments and medical patient management, utilizing ReactJS and Electron to deliver efficient systems.
- Architected and developed real-time applications, integrating WebSockets, ReactJS, and Node.js to enable dynamic user experiences.
- Converted ReactJS components to other frameworks (SolidJS, Svelte, Vue3) demonstrating adaptability and cross-framework understanding.
- Applied various styling libraries (Tailwind, ChakraUI, PandaCSS, Stitches) and implemented state management solutions (Redux, ReduxToolkit, Zustand, React Context, SolidJS Context, XState), ensuring UI consistency and effective application state control.

Technologies: JavaScript, TypeScript, React.js, Redux, GraphQL, Node.js, PostgreSQL, Docker, Jenkins, Sentry, Jest, SolidJS, Vue3, SQL/NoSQL databases, Nginx, PHP, WordPress, WooCommerce, REST APIs, React Native, Electron, Capacitor, Expo, Zustand, XState, Redux Toolkit, Express.js, Fastify, Hono

Web Specialist **Akson** **November 2015 - June 2018**
Constanta, Romania

As a member of the Akson team, I actively participated in developing software solutions. My contributions perfected my skills in the following areas:

- Partnered with 5+ diverse clients, developing customized e-commerce solutions and integrations across multiple payment gateways (Mobilpay, Stripe, PayU) and shipping providers (FanCourier, UrgentCargus).
- Delivered 10+ custom plugins for WordPress and WooCommerce, enhancing payment flexibility, product imports, design customization, and purchase options.
- Spearheaded business CMS implementations (Craft CMS, Vue2), building tailored solutions for various industries.
- Boosted codebase efficiency and maintainability by refactoring plugins with improved architecture and design patterns.
- Optimized integration processes between payment/shipping providers and internal systems, resulting in a 15%+ increase in order processing speed.
- Streamlined development workflows specific to e-commerce platforms and CMS technologies.
- Mentored 3+ junior developers in e-commerce best practices, plugin development, and CMS workflows.
- Produced clear technical documentation and contributed to internal knowledge-sharing initiatives, enhancing team-wide skills.
- Leveraged troubleshooting expertise to resolve platform-specific performance issues, ensuring seamless user experiences across payment and shipping processes.

Technologies: JavaScript, jQuery, WordPress, WooCommerce, PHP, Apache Server, HTML, CSS, Twig, Craft CMS, Yii Framework, GIT, Waterfall, Photoshop, Vue2, ReactJS, Node.js

Education

- Ovidius University of Constanta, Department of Mathematics and Computer Science (2015 - 2018)
- "Constantin Bratescu" National College, Mathematics and Informatics (2011 - 2015)
    - Certified in Informatics
    - I won 1st place at the computer science competition at Ovidius University in 2013

Skills and Technologies

- Languages: JavaScript, TypeScript
- Technologies: React.js, Next.js, Vue.js, Redux, Node.js, AWS(EC2, S3, ECS), Docker, Nginx, SQL/NoSQL databases, xState, Zustand, Express.js, Fastify, Angular
- Other: Web Performance, Restful APIs, Microservices Architecture, PHP, Rust, WordPress, WooCommerce, Craft CMS, Laravel, Wii Framework

Projects & Extra

- **ASDA** - My work at Asda perfected my skills in building accessible, performant React.js components, optimizing for SEO, and understanding architectural considerations. Adept at collaborating with stakeholders, I'm driven to deliver inclusive, user-centric web solutions that have a tangible impact on Asda's goals. I bring strong technical expertise in web accessibility standards and a focus on delivering robust, user-friendly experiences.
- **TELLUR** - Leveraging my experience developing the TELLUR website, I bring full-stack WordPress expertise to the team. I excel in API design and integration, production-ready systems development, and task management.

- **Vodafone** - From my time at Vodafone, I bring expertise in translating designs into responsive React components, streamlining data acquisition through web scraping, and developing engaging marketing visuals. I'm eager to transfer these skills to new challenges and contribute to impactful user experiences.

Languages

- English: Basic Proficiency
- Romanian: Native Proficiency

Hobbies & Personal

- In my free time I like to go in nature, read about new technologies and spend time with family.
